

# Investment Memo One Pager

**RISK WARNING:** This information is only intended to be viewed by qualified investors as defined in their jurisdiction. Past performance is not a reliable indicator of future performance. Investors should remember that the value of an investment and the income received can go down as well as up, and they may not get back the amount they invested.

## OVERVIEW

INDX is the pre-eminent Masternode investment token. Own INDX to receive a regular passive income. An award-winning, VC-led, asset-backed and regulatory-compliant STO, fully tradable on exchanges, giving investors liquidity with zero exit fees. Launching June 1st, 2019, in association with Swarm. INDX token holders receive a Qtrly Dividend of 50% net yield from the Masternode portfolio. The remaining 50% is reinvested back into the fund to grow the token value on exchanges. For an independent assessment, please read the independent due diligence report published by VC Iconic Lab [here](#).

## MASTERNODES

In simple terms, Masternodes can be viewed as the next generation of crypto mining. Each Masternode owner must stake a deposit which differs between networks but produces consistent block rewards. The number of Masternodes has exploded from a few hundred in 2017 to over 250k. There are 3 main obstacles gaining exposure; Selection, Hosting and Staking. The INDX token is the elegant solution to those problems.

## INDX TOKEN

A risk-managed portfolio of Masternodes. The INDX algorithm scans the market & selects an outperformance basket. The INDX platform securely spins up and stakes the Masternodes while collecting the rewards. The INDX hedge protects against any market depreciation. The INDX Dashboard gives investors visibility on their returns. The INDX trial portfolio is achieving yields circa 130% (fully hedged). Profits are sent directly to INDX holder's wallets.

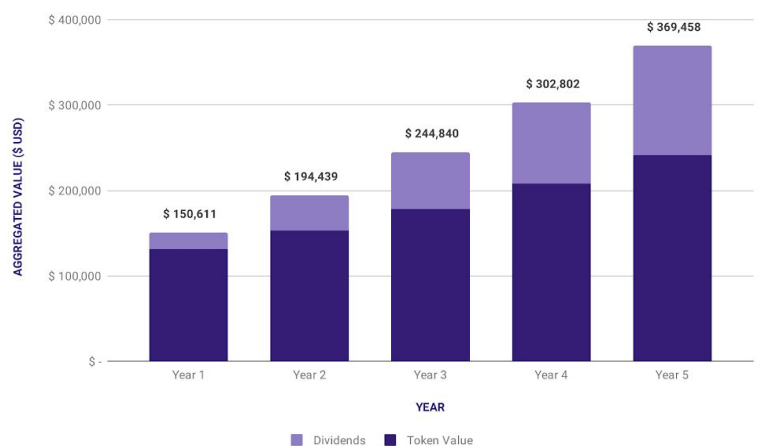

## PRE-SALE

Before our May 1st Sale date, INDX are releasing a pre-sale allocation to qualified investors.

Limited to \$200k and attracting a **50%** bonus. Allocation will be on a 'first come, first served' basis. A 5 year ROI study for a \$100k investment with a 50% bonus is modelled:

**TOKEN VALUE AND DIVIDENDS - 5-YR FORECAST**

\$100k Investment (50% Bonus)
